

A close-up photograph of a person's hands opening a rectangular, light-colored pulp container. The container is filled with a mixture of diced fruits and vegetables, including pineapple, orange, and green peas. The person is using their fingers to peel back the clear plastic lid. In the background, a green plate and a silver spoon are visible. The overall scene suggests a healthy meal preparation.

Pulp

Product Guide

For makers of good food...

Made from sturdy, sustainable wheatgrass, our pulp range of products includes meal trays, portion cups and produce trays.

Much of our pulp range is not coated or lined, making pulp a fantastic choice from an environmental standpoint, as well as a practical and beautifully designed food packaging solution.

Lid Compatibility

Heat Sealable

Designed to be used with heat sealing machinery and a compatible film lidding.

Clip-On Lids Available

Clip-on lids are available for our portion cups.

Suited for

Microwavable

Chilled Contents

Frozen Contents

Environment

Made from sustainable wheatgrass, the majority of our pulp product range (with the exception of our pulp meal trays) are not lined or coated, making pulp an exceptional, environmentally friendly alternative to single-use plastics.
